In an interview with Eddie Gallaher on WTOP-TV at about 6:30 p.m. 3/13/67 in a discussion of his mis-titled book "The Truth About the Kennedy Assessination" (as though he knew it) Robert misquoted me in a way that indicates either he is a deliberate liar or hasn't even looked at my book. He said that I said there had been a shot from the from because the doctors at Parkland Hospital so said in a press conference about an hour after the assassination. This is entirely false. The only mention I make ofthe medical press conferences is to show the possibilities of perjury by one doctor and of the pressure on the doctors to change their story by the federal government. My reference to front-entrance wounds is 100% from the evidence (and mine is the only book to do this) and I lean heavily on the handwritten autopsy report, which was written two days later and which quotes what Dr. Humes was told by Doctor Perry.
